

HRcommand

Easy account administration at your fingertips

With Optum Financial, you can easily access and manage all of your benefit accounts with our **HRcommand® administrative management platform**. Administrators can access the information they need in one consolidated dashboard with access to tools and resources that save time and improve the employee experience.

- ✓ Allows employers to access transaction information quickly and easily monitor tasks needed to complete key milestones
- ✓ Makes administration easier with intuitive design, helpful tools and useful tips that lets employers focus on their business, not paperwork
- ✓ Provides quick access to add and manage new employees, update employee records and pull detailed account reports in minutes

HRcommand features include:

- Useful data summaries and built-in shortcuts to important informations
- Quick navigation and access to key functions throughout
- Detailed reporting package complete with account balance, contributions, account utilization, claim activity and funding reports
- Easy updates to employee records, account funding and plan setup
- Ability to increase claim auto-substantiation rates by entering in copay costs
- User roles allowing segmented access levels, so your finance and human resources departments can quickly access important information
- Ability to select required data and create, save and send custom reports with ease

Powerful insights

The HRcommand Insights provides a variety of reports for every process, giving administrators quick access to valuable data. It is highly flexible and allows onscreen data manipulation to fit your specific business needs.

Popular reports include:

- Account Balances
 - Claims
 - Contributions
 - Customer Identification Program (CIP)
 - Enrollments
-
